

The diagram illustrates player movement on a soccer field. The field is represented by a green grid with white lines for the center circle, goal areas, and goalposts. Two teams are represented by red and blue lines with arrows, indicating their movement paths. Numerous white circles mark the starting positions of players. A yellow line highlights a specific path in the upper half of the field. The paths show players moving from their starting positions towards the center and goal areas, with some players crossing the center line and others staying in their respective halves.
